ABOUT THE PROGRAM

The Apple Developer Academy is an educational program designed by Apple Inc. to help students and aspiring developers learn various skills related to app development, design, and entrepreneurship. The academy typically offers courses and workshops covering topics such as coding, user interface design, app marketing, and business development.

The program often focuses on Apple's ecosystem, including iOS, macOS, watchOS, and tvOS platforms, and utilizes tools like Swift, Xcode, and SwiftUI for app development. It's often seen as a prestigious opportunity for those looking to dive into the world of Apple app development.

The Apple Developer Academy has various locations around the world, each offering its own curriculum and resources. Admission to these academies is usually competitive, and students often undergo a rigorous selection process to be accepted into the program.

MICHIGAN STATE UNIVERSITY

Key Features & Aspects

- **Focus on App Development**

The primary emphasis of the apple developer academy is on training individuals in app development for apple's ecosystem, including ios, mac os, watch os, and tv os.

- **Collaboration with Universities**

Apple collaborates with universities and institutions globally to establish these academics. These institutions serve as hubs for learning and collaboration.

- **Real-World Projects**

The academy typically engages students in hands-on, real-world projects to provide practical experience in app development. This approach aligns with Apple's emphasis on practical skills and innovation.

Key Features & Aspects

- **Inclusivity & Diversity**

The Apple Developer Academy often highlights principles of inclusivity and diversity. It aims to provide opportunities to individuals from various backgrounds and experiences.

- **Networking Opportunities**

Students in the academy have the opportunity to connect with other students, mentors, and industry professionals, fostering a network of collaboration within the Apple developer community.

- **Industry-Relevant Curriculum**

The curriculum is designed to meet industry standards and provide students with the skills and knowledge needed for success in the technology and app development sector.

Mackenzie

Key Features & Aspects

- **Environmental & Social Responsibility**

Apple's commitment to environmental and social responsibility is often integrated into the ethos of the academy.

Build apps. Build your future.

Type of Programs

01 •Foundation (30 Days)

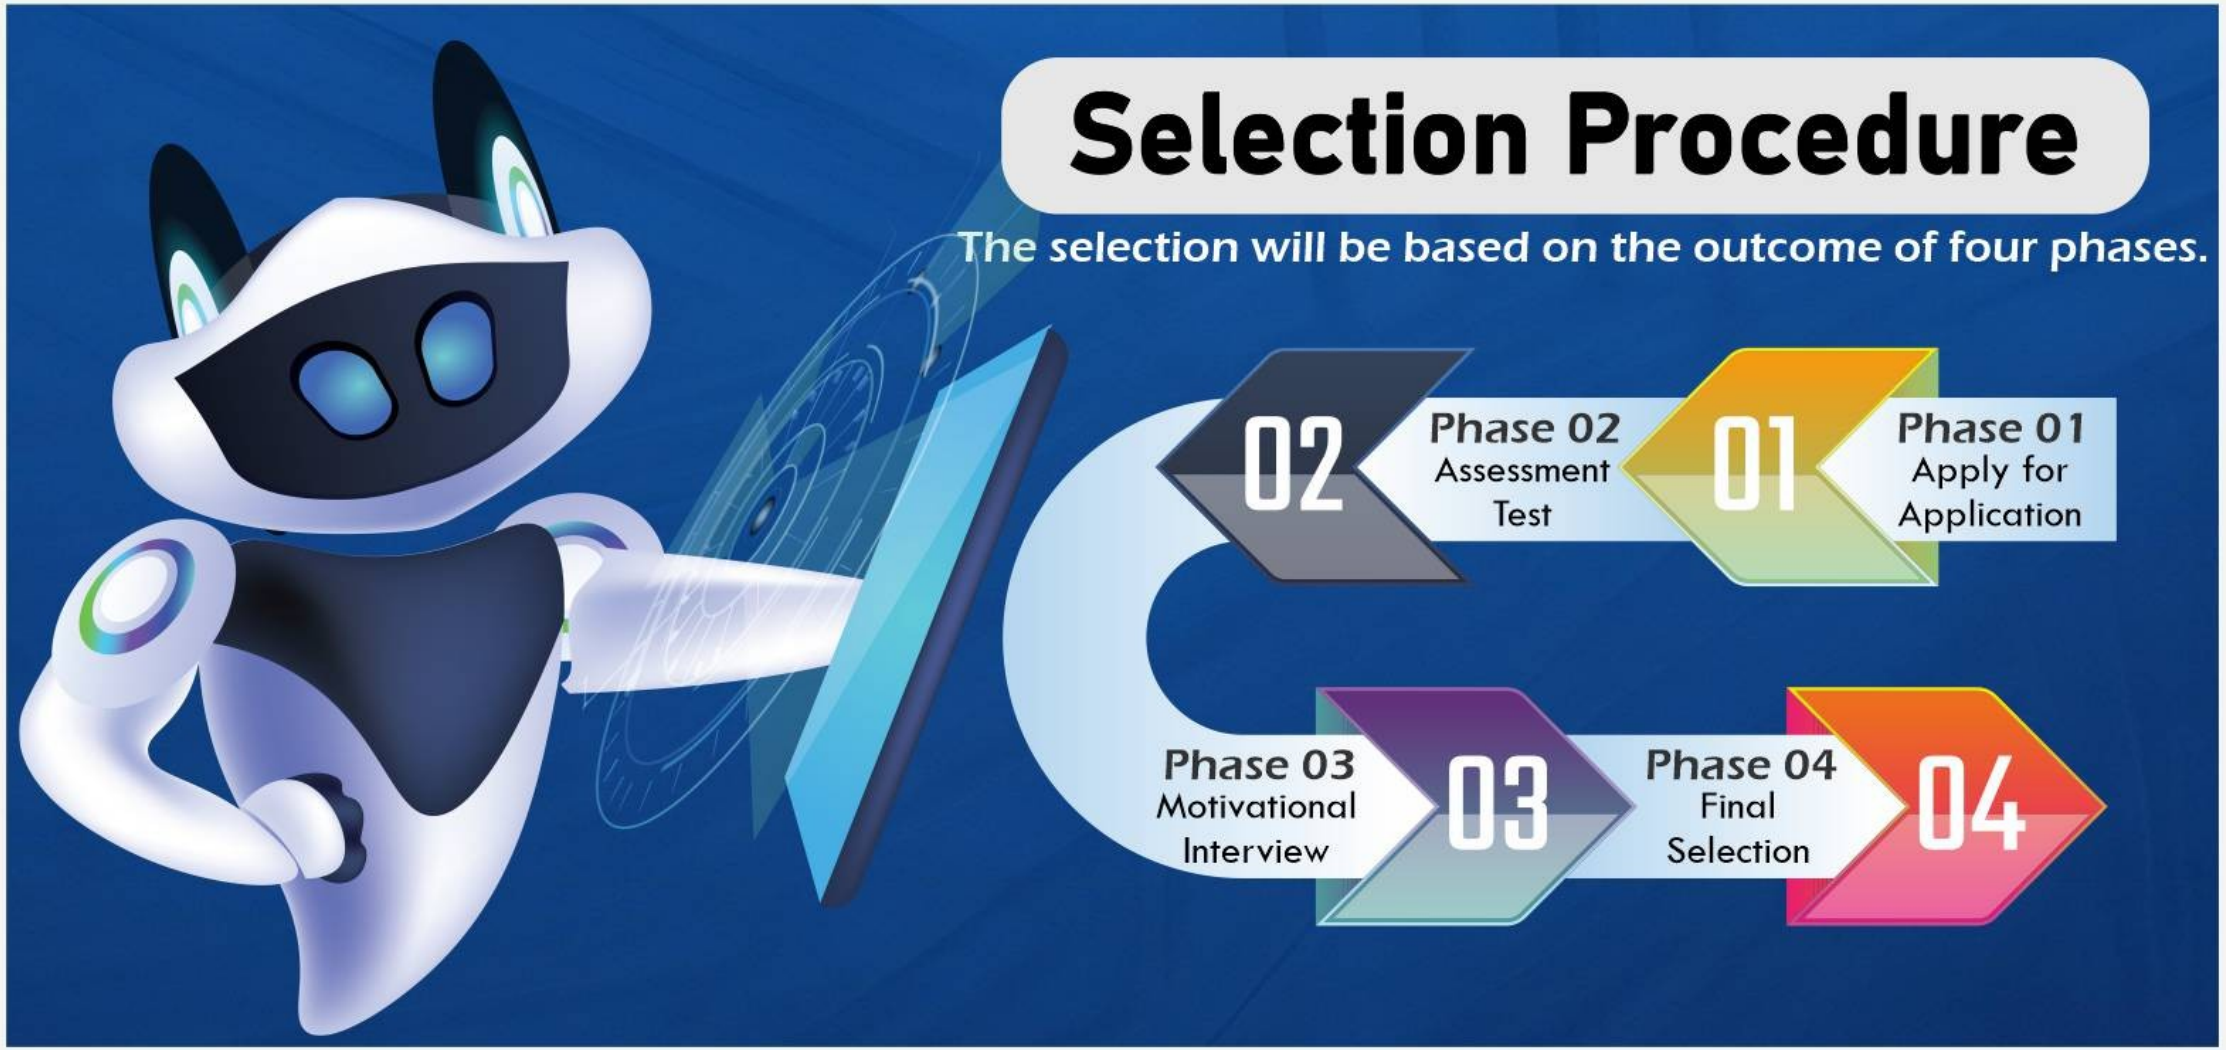
02 •Academics (10 Months)

03 •Academics (2 Year)

PUCPR
GRUPO MARISTA

Selection Procedure

The selection will be based on the outcome of four phases.



PUCPR

ADMISSION REQUIREMENTS

01 **Basic Coding** Required

02 **No Experience** Required

03 **No IELTS** Required

04 **Only 18+** Mandate

Assessment Test

Applicants will be invited to sit for an automated assessment based on a multiple-choice test.

Respondents will be asked to select the only correct answer out of the 4 available choices from a list of 30 stems. Each correct answer adds 2 points to the total mark, whereas each wrong answer will subtract 0.5 points from the test taker's score. Missing answers will have no influence on the total mark (i.e., they count as 0 points). With the above-mentioned rules, the maximum achievable test score is 60 points.

The test will have a duration of 60 minutes and will touch upon the following topics:

1. Logical reasoning.

2. Coding:

- Basic concepts
- Object Oriented Programming
- Swift programming basics
- Design Patterns

3. Design:

- Basic concepts
- Responsive and adaptive design
- Human Interface Guidelines
- User-centered design processes
- Sketches, prototypes, wire frames (i.e., interaction specifications), etc.

The first phase will be aimed at selecting the top 400 applicants, ranked by score.

Motivational Interview

A maximum of 40 points can be earned with the interview.

The 400 applicants selected after phase 1 will be invited to a motivational video-conference interview, in English, during which they will have a chance to present their own portfolio ofcompetences. A maximum of 40 points can be earned with the interview.

During the interview, applicants might be asked:

1. to provide a brief presentation of their curriculum vitae.
2. to explain the professional reasons grounding their application.
3. to describe their career perspectives as a result of the course.
4. to illustrate the technological issues they are more interested in.
5. to specify the application areas in which they believe to be able to develop their activities under the program.
6. to provide a description of their individual and professional characteristics.
7. to provide a description of their creative skills.

During the interview the applicant might also be asked to briefly present a solution approach to a simple logical-computational problem and/or sketch a base design palette for a project.
